

With great pride, we at Team Snubbing Services are pleased to announce our acquisition of Northern Snubbing Services Inc. based in Fort St. John, British Columbia, Canada.

We feel comfortable and confident in our decision to fly the Northern Snubbing Flag alongside of our existing Team Snubbing Services Inc. product lines.

Northern Snubbing Services Inc. has built a great brand with competent team members and a strong customer base, all local to F.S.J.

“With this expansion we plan to expand on the considerable quality of service and offerings to the industry that the teams in F.S.J have previously delivered. We now have specialized equipment in separate product lines to service virtually all oil and gas resources currently available for market.” Mike Watts – Managing Partner/C.E.O.

Team Snubbing Services now provides patented push pull units for heavy oil SAGD applications, “mini” Snubbing unit rig assist jacks for low pressure underbalanced oil and/or gas applications, Class 2 or Class 3 freestanding units for light oil and shallow gas applications, as well as Class 3, 5k or 10k High Pressure ram to ram packages for deeper wet gas and shale plays.

“With our diverse equipment spread and our competent teammates, we have the ability to find a solution or a service to offer to all of our customers. We are proud to offer equipment that suits our customers needs. With the addition of Brady, Jeff and Dustin in F.S.J, along with their competent crews, we are confident that the services we offer will only improve” Adam MacDonald – Managing Partner/C.O.O.

Team Snubbing Services Inc. is looking forward to building long lasting relationships with our teammates and providing current and future customers with reliable snubbing operations.
